SUMMARY

Full-Stack Software Engineer with 2+ years of experience at London Stock Exchange Group developing enterprise financial applications using C#, ASP.NET Core, Angular, TypeScript, React/Preact, GraphQL, REST APIs, and SQL. Delivered 35+ production features and reusable micro-frontends for applications supporting 100K+ users. Experienced in end-to-end development, API integration, state management, database optimization, production support, and automated testing with 90%+ unit-test coverage on owned features.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL
Frontend: Angular, React, Preact, HTML5, CSS3, NgRx, RxJS, Micro Frontends
Backend & APIs: ASP.NET Core, REST APIs, GraphQL, Entity Framework Core, JWT Authentication
Databases: PostgreSQL, SQL Server, Query Optimization, Database Views
Cloud: AWS (Application Deployment)
Testing: Unit Testing, End-to-End Validation
Tools & Engineering: Git, GitHub, Visual Studio, VS Code, pgAdmin, Jira, Nx Monorepo, Agile/Scrum, Code Reviews

EXPERIENCE

London Stock Exchange Group (LSEG)
Aug 2024 – Present

Software Engineer
Bengaluru, India

- Delivered and enhanced 35+ production features across enterprise financial applications using Angular, TypeScript, Preact, ASP.NET Core, GraphQL, and REST APIs, supporting products used by 100K+ users.
- Built 5 reusable micro-frontend components and enhanced approximately 5 existing components, improving reuse and consistency across independently deployed application surfaces.
- Developed 10+ ASP.NET Core backend/API components and integrated 5+ REST and GraphQL APIs supporting search, analytics, and data-driven frontend workflows.
- Implemented complex frontend workflows and asynchronous state management using Angular, NgRx, and RxJS for responsive desktop and mobile applications.
- Maintained 90%+ unit-test coverage for owned frontend and backend features and performed end-to-end validation before QA handoff and production releases.
- Diagnosed and resolved 150+ production defects through root-cause analysis across UI, API, integration, and data layers, strengthening application reliability.
- Optimized database access using SQL/database views and query tuning to reduce processing overhead; contributed to frontend and backend pull-request reviews and quarterly production releases.

PROJECTS

Advanced Events Search | Angular, TypeScript, NgRx, RxJS, GraphQL *LSEG*

- Delivered approximately 20 features for an enterprise financial-events search application supporting 100K+ users across desktop and mobile, covering search, data presentation, and user workflows.
- Integrated GraphQL APIs and implemented asynchronous state management using NgRx and RxJS for responsive data-driven workflows.
- Resolved 100+ production issues through root-cause analysis and end-to-end validation while maintaining 90%+ unit-test coverage on developed features.

Private Markets Analytics Platform | Preact, ASP.NET Core, GraphQL, Micro Frontends *LSEG*

- Developed 5 financial-analytics micro-frontend widgets with filtering and pagination using reusable UI modules aligned with LSEG's Design System.
- Built 5+ ASP.NET Core backend/API components and integrated GraphQL workflows supporting analytics data retrieval and frontend requirements.
- Contributed across frontend, backend, and integration layers with end-to-end ownership of feature implementation.

AI Career Hub | Angular, ASP.NET Core, EF Core, PostgreSQL, JWT, AWS *Personal Project*

- Developed a full-stack career management application with secure authentication, career profiles, resume management, and experience and education workflows.
- Designed a layered ASP.NET Core Web API using controllers, DTOs, services, repositories, and Entity Framework Core with PostgreSQL persistence.
- Implemented JWT authentication using ASP.NET Identity PasswordHasher, centralized exception handling, validation, and standardized API error responses.
- Built the Angular frontend and integrated it with backend REST APIs for authentication, career-profile, and resume-management operations.
- Deployed the full-stack application to AWS, gaining hands-on experience with cloud application hosting and deployment.

EDUCATION

PSG College of Technology 2022 – 2024
Master of Computer Applications (MCA) – CGPA: 9.10 Coimbatore

PSG College of Technology 2019 – 2022
B.Sc. Computer Systems and Design – CGPA: 8.77 Coimbatore

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) – Microsoft

Generative AI: Introduction and Applications – IBM
