SUMMARY

Software Engineer with 2+ years of experience building and enhancing enterprise full-stack web applications using Angular, TypeScript, React/Preact, ASP.NET Core, GraphQL, REST APIs, and SQL. Delivered 35+ features across multiple applications and resolved 150+ production issues across frontend and backend. Experienced in micro frontend architecture, API integration, query optimization, automated testing, and building scalable applications supporting 100K+ users.

EXPERIENCE

London Stock Exchange Group

Aug 2024 – Present

Software Engineer

Bangalore, India

- Developed and enhanced 35+ full-stack features across multiple enterprise applications using Angular, TypeScript, Preact, ASP.NET Core, GraphQL, and REST APIs.
- Resolved 150+ production issues across frontend and backend through root-cause analysis and end-to-end validation, improving application reliability and reducing defects.
- Built 5 new reusable web components and enhanced approximately 5 existing components within a micro frontend architecture, improving component reuse and integration across applications.
- Integrated 5+ REST and GraphQL APIs to support data-driven workflows and seamless communication between frontend and backend services.
- Developed and maintained features with 90%+ unit-test coverage across frontend and backend, followed by thorough end-to-end testing before QA handoff to improve release quality.
- Contributed to enterprise applications supporting 100K+ users, delivering scalable features aligned with business and technical requirements.
- Optimized database queries using database views to reduce data processing overhead and improve application load performance.
- Participated in frontend and backend pull-request reviews, contributing to code quality, maintainability, and consistency across the codebase.

PROJECTS

Advanced Events Search | Angular, TypeScript, NgRx, RxJS, GraphQL

- Delivered approximately 20 features for a high-performance enterprise financial events search application supporting 100K+ users across desktop and mobile platforms.
- Resolved 100+ production issues through root-cause analysis, comprehensive testing, and end-to-end validation, improving application stability and reliability.
- Integrated GraphQL APIs and implemented application state management using NgRx and RxJS, maintaining 90%+ unit-test coverage for developed features.

Private Markets Analytics Platform | Preact, ASP.NET Core, GraphQL, Micro Frontends

- Developed 5 micro frontend financial analytics widgets with filtering and pagination capabilities for an enterprise financial analytics platform.
- Built 5+ ASP.NET Core backend/API components to support scalable analytics workflows and frontend data requirements.
- Integrated GraphQL workflows between frontend widgets and backend services to enable efficient data retrieval and dynamic analytics experiences.
- Developed reusable UI modules using LSEG's Design System, promoting consistency and maintainability across the application.
- Contributed across both frontend and backend development, gaining end-to-end ownership of feature implementation and integration.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL
Frontend: Angular, React, Preact, NgRx, RxJS, Micro Frontends
Backend: ASP.NET Core, REST APIs, GraphQL
Databases: PostgreSQL, SQL Server
Testing: Unit Testing, End-to-End Testing
Tools: Git, Jira, Visual Studio, VS Code, pgAdmin
Methodologies: Agile, Scrum

EDUCATION

PSG College of Technology	2022 – 2024
Master of Computer Applications (CGPA: 9.10)	Coimbatore
PSG College of Technology	2019 – 2022
B.Sc. Computer Systems and Design (CGPA: 8.77)	Coimbatore

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900) – Microsoft
Generative AI: Introduction and Applications – IBM
