SUMMARY

Full-Stack Software Engineer with 2+ years of experience building enterprise financial applications using C#, ASP.NET Core, Angular, React/Preact, TypeScript, GraphQL, REST APIs, and SQL. Delivered 35+ production features, reusable micro-frontends, and API integrations for applications supporting 100K+ users while maintaining 90%+ unit-test coverage on owned features. Experienced across frontend, backend, database optimization, production debugging, and end-to-end feature delivery.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL

Frontend: Angular, React, Preact, HTML5, CSS3, NgRx, RxJS, Micro Frontends

Backend & APIs: ASP.NET Core, REST APIs, GraphQL, Entity Framework Core, JWT Authentication

Databases: PostgreSQL, SQL Server

Cloud: Microsoft Azure, AWS

Testing: Unit Testing, End-to-End Testing

Tools & Engineering: Git, GitHub, Visual Studio, VS Code, pgAdmin, Jira, Nx, Agile/Scrum, Pull Request Reviews

EXPERIENCE

London Stock Exchange Group (LSEG)

Aug 2024 – Present

Software Engineer

Bengaluru, India

- Delivered and enhanced 35+ production features across enterprise financial applications using Angular, TypeScript, Preact, ASP.NET Core, GraphQL, and REST APIs.
- Built 5 reusable micro-frontend components and enhanced approximately 5 existing components, improving reuse and consistency across independently deployed application surfaces.
- Developed 5+ ASP.NET Core backend/API components and integrated 5+ REST and GraphQL APIs supporting search, analytics, and data-driven frontend workflows.
- Implemented complex frontend workflows and asynchronous state management using Angular, NgRx, and RxJS for responsive desktop and mobile applications.
- Maintained 90%+ unit-test coverage for owned frontend and backend features and performed end-to-end validation before QA handoff and production releases.
- Diagnosed and resolved 150+ production defects through root-cause analysis across UI, API, integration, and data layers, strengthening application reliability.
- Optimized database access using SQL/database views to reduce processing overhead and contributed to frontend and backend pull-request reviews for applications supporting 100K+ users.

PROFESSIONAL PROJECTS

Advanced Events Search | Angular, TypeScript, NgRx, RxJS, GraphQL

- Delivered approximately 20 features for an enterprise financial-events search application supporting 100K+ users across desktop and mobile, contributing to search, data presentation, and user workflows.
- Integrated GraphQL APIs and implemented predictable application state management using NgRx and RxJS for asynchronous data-driven workflows.
- Resolved 100+ production issues while maintaining 90%+ unit-test coverage for developed features through root-cause analysis, regression testing, and end-to-end validation.

Private Markets Analytics Platform | Preact, ASP.NET Core, GraphQL, Micro Frontends

- Developed 5 financial-analytics micro-frontend widgets with filtering and pagination using reusable UI modules aligned with LSEG’s Design System.
- Built 5+ ASP.NET Core backend/API components and integrated GraphQL workflows supporting analytics data retrieval and frontend requirements.
- Contributed across frontend, backend, API, and integration layers, providing end-to-end ownership of feature implementation.

PERSONAL PROJECTS

AI Career Hub | Angular, ASP.NET Core, EF Core, PostgreSQL, JWT

- Developed a full-stack career management platform supporting secure authentication, career profiles, resume management, education, experience, and job-application workflows.
- Designed a layered ASP.NET Core Web API using controllers, DTOs, services, repositories, and Entity Framework Core with PostgreSQL persistence.
- Implemented JWT-based authentication using ASP.NET Identity PasswordHasher, centralized exception handling, validation, and standardized API error responses.
- Developed the Angular frontend and integrated it with backend APIs for authentication, career-profile, and resume-management workflows.

Developer Portfolio | React, TypeScript, Vite, Vercel

- Designed and developed a responsive developer portfolio showcasing professional experience, technical skills, certifications, and software projects using React and TypeScript.
- Implemented reusable UI components and responsive navigation, and deployed the application to Vercel with automatic production deployments from GitHub.

EDUCATION

PSG College of Technology	2022 – 2024
Master of Computer Applications (MCA) – CGPA: 9.10	Coimbatore
PSG College of Technology	2019 – 2022
B.Sc. Computer Systems and Design – CGPA: 8.77	Coimbatore

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)** – Microsoft
- Generative AI: Introduction and Applications** – IBM
